Global Infrared Lamps Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Infrared Lamps can be defined as electrical devices which emit infrared radiation. Infrared lights are utilized to amplify light in a low-light situation to facilitate video recording and image capturing. It is also used in medical application for relief of muscle pain and tension, and for the treatment of autoimmune diseases. Infrared lamps also have application in radiant heating for industrial processes and building heating. The rising incidences of acute and chronic pain globally and increasing utilization of infrared lamps night vision equipment as well as recent product launches from leading market players are factors that are accelerating the global market demand. For instance, according to American Society of Anesthesiologists – Globally, Chronic pain affects around 10 percent of the population, which accounts for around 60 million people. Furthermore, according to Centers for Disease Control and Prevention - in 2019, in United States, around 20.4% of adults were reported to be affected with chronic pain and around 7.4% of adults were affected by high impact chronic pain. Moreover, in January 2022, Victory Lighting (UK) Limited unveiled new ESE infrared

lamp range. These new lamps are designed for use in PET processing and claimed to reduce energy consumption by around 17.4%. Also, growing advancements in infrared light treatment and increasing patient inclination towards non-invasive treatment procedure are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, negative effects associated with infrared light therapy such as irritability, headaches, eye strain, sleep disturbances, and insomnia among others impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Infrared Lamps Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing prevalence of skin diseases such as dermatitis and skin melanoma and growing advancements in healthcare sector. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028.
