Global Inhaled Nitric Oxide Delivery Systems Market is valued approximately at USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than xxx over the forecast period 2021-2027. Inhaled nitric oxide delivery system works by providing relaxation to the smooth muscle to widen blood vessels to comfort the patient with respiratory problems. Inhaled nitric oxide delivery system in some cases is used for infant babies to help them in breathing and it is also used for chronic respiratory diseases. Increasing R&D activities leading to new application in health care industry to improve patients experience is boosting the Inhaled nitric oxide delivery system market. Rising generic population with lung and respiratory diseases serves as a driver for the market. According to World Health Organization, an estimated 65 million people have suffered from severe chronic obstructive pulmonary disease (COPD), from which about 3 million die each year, which make it the third leading cause of death worldwide – and the numbers are increasing and more than 100 million people suffer from sleep-disordered breathing. According to the survey, more than 50 million people struggle with occupational lung diseases. Moreover, the rise in the prevalence of respiratory diseases such as chronic obstructive pulmonary disease and asthma may also propel the global inhaled nitric oxide delivery system market. Approximately 334 million people suffer from asthma, being the most common chronic disease of childhood, affecting 14% of children globally However, strict rules and norms across various regions for inhaled

nitric oxide delivery system impedes the growth of the market over the forecast period of 2021-2027. Also, favorable government initiative and rising concern for health in developed economies is likely to increase the market growth during the forecast period.

The regional analysis of global Inhaled Nitric Oxide Delivery Systems Market includes key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to increasing chronic diseases and high adoption of advanced technological products. Whereas, Europe is also anticipated to exhibit highest growth rate over the forecast period 2021-2027. Factors such as rising generic population would create lucrative growth prospects for the Inhaled Nitric Oxide Delivery Systems Market across Asia-Pacific region.
