Global Inorganic Salts Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Inorganic salt is one that does not contain C-H bonds as opposed to an organic salt that contains C-H bonds. One of the most commonly known salt is sodium chloride, which is a chemical compound comprised of sodium and chloride ions. The increase in the consumption of nutritious food products, increased use in pharma industry has led to the adoption of Inorganic salts across the forecast period. For Instance: According to the Indian Economic Survey 2021, the domestic market is expected to grow 3x in the next decade. India's domestic pharmaceutical market is estimated at USD 42 billion in 2021 and likely to reach USD 65 billion by 2024 and further expand to reach US\$ 120-130 billion by 2030. Also, with the expanding healthcare industry, the adoption & demand for Inorganic salts is likely to increase the market growth during the forecast period. However, toxicity associated with inorganic salts impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Inorganic Salts Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the widespread use of inorganic salts as an antacid in the pharmaceutical industry. Whereas, Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period

2022-2028. Factors such as increase in the consumption of nutritious food products due to the evolving dietary habits would create lucrative growth prospects for the Inorganic Salts market across Asia-Pacific region.
