Abstracts

Global Insect Feed Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than 11.7% over the forecast period 2022-2029. Insect Feeds are meals for animals which are enriched with high protein and nutrients. The Insect Feed market is expanding because of factors such as rising demand for farmed fish and fish oil as well as increase in production capacity. This market is dominated by Alltech Coppens, Protix, Ynsect, Enviroflight and Loopworm.

Fish Farmers have become more efficient by breeding fishes that are omnivorous such as tilapia and using feeds containing soybeans and other grains. Today, salmon diets typically consist of less than 10% fishmeal. About 80% less forage fish is used per pound of production than it was 15 years ago. It could be much lower, says Rick Burroughs, who has been developing fish food for the past 30 years at the U.S. Department of Agriculture's Bozeman, Montana lab. 'Fish don't need fishmeal,' says Burroughs. 'They need nourishment' for which insect feed is very helpful. With the increasing demand of seafood has already caused overfishing of many marine fish stocks and almost half of all seafood now comes from aquaculture. Most of the growth is happening in Asia where it has 90% of the farms. China, the world leader, imports additional fish to make fish oil, fish feed and other products. Furthermore, the advancement in technology is expected to increase the opportunity in the forecated years. However, the stringent rules and regulations for new insect feed stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Insect Feed Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America

dominated the market in terms of revenue, owing to the dominance of branded products. In June 2021, Chile's venture capital firm KeyyakVenture invested \$4.5 million in an insect food startup named Food for the Future (F4F). As a result, the increased investment by these VC firms demonstrates their belief in expanding this market. Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising target populations, an increase in the number of collaborations for development, geographic expansion of key players, and active participation of government and nonprofit organizations in the market space.
