Abstracts

Global Internet of Behaviors (IoB) Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than 22% over the forecast period 2022-2029. Internet of Behaviors (IoB) refers to the collection and use of data to access consumer behaviors. Data collected from different devices including Wearable technologies, individual online activities, and household electrical devices, is utilized to gather information about user behavior and interests. Moreover, IoB combines three fields including behavioral science, edge analytics and the Internet of Things (IoT). This data is further used by marketers to develop and promote new products based on human psychology. The increasing penetration of IoT devices worldwide and growing cloud spending across industries as well as rising utilization of psychological targeting in advertising are key factors accelerating the market growth.

The increasing penetration of IoT-enabled devices owing to the growth of high-speed internet services is contributing to the growth of the market over the forecast period. For instance, according to Statista –the total number of Internet of Things (IoT) devices worldwide was estimated at 9.7 billion in 2020 and the total number of IoT devices is projected to grow to 29 billion IoT devices by 2030. Also, growing emergence of AI and

ML technologies and increasing adoption of digital marketing tools would create a lucrative growth prospectus for the market over the forecast period. However, rising concern over data privacy & security stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Internet of Behaviors (IoB) Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the presence of leading market players as well as rising spending on digital advertising across different industries in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising spending from government authorities towards smart cities as well as growing emergence of high-speed internet services in the region.

Major market players included in this report are:

Aware Inc.

Traceable

Guardian Analytics

Vertica Systems

Trifacta

NuData Security

Mazu Networks Inc.

Recent Developments in the Market:

In May 2022, San Francisco, USA based Traceable AI, raised USD 60 million in Series B funding. This funding round was led by Institutional Venture Partners (IVP) and saw participation from other prominent investors including Tiger Global Management and existing investors Unusual Ventures and BIG Labs. This funding would be used for new product development and accelerating research activities, and in the expansion of sales and marketing teams.
