## **Abstracts**

Global Internet of Things (IoT) Based Life Insurance Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Internet of Things (IoT) Based Life Insurance refers to the application of IoT-based devices in the insurance sector. The application of IoT in life insurance can help the insurance provider to gauge the risk associated with issuing life insurance to an individual. Health insurance can get access to accurate health data of an individual through the application of IoT-based devices such as blood pressure levels, heart rate, and oxygen levels among others. This data can also be used for the development of new products and models. The increasing penetration of IoT in the healthcare sector and growing expansion of the life insurance industry as well as strategic initiatives from leading market players are key factors accelerating the market growth.

The growing penetration of IoT in the healthcare sector is contributing to the growth of the Global IoT-based Life Insurance market. For instance, according to Statista - In 2019, globally healthcare-related IoT revenues were estimated at USD 41.57 billion, and the revenues are projected to grow to USD 135 billion by 2025. Also, the rising emergence of digital insurance providers in developing regions and increasing adoption of cloud-based platforms would create lucrative growth prospects for the market over the forecast period. However, the data security & privacy concerns associated with IoT-

based devices impede the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Internet of Things (IoT) Based Life Insurance Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region in terms of market share owing to the presence of leading market players and the increasing adoption of IoT devices by health insurance providers in the region. Whereas the Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as the rising expansion of the IoT devices market as well as increasing penetration of health insurance in the region.
