## **Abstracts**

Global Intracranial Aneurysm Market is valued at approximately USDXX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. An intracranial aneurysm is also known as a cerebral aneurysm or brain aneurysm. It is a condition that leads to the bulge or ballooning of a brain's blood vessel. The wall of the arteries is at a huge risk of bursting (rupturing). The growing incidences of brain aneurysms, the emergence of technologically advanced products, and increasing demand for minimally invasive procedures are the primary factors driving the market growth across the globe. For instance, as per a Statista report, the minimally invasive surgery market worldwide was estimated to be worth around USD 20.5 billion in 2019 and the amount is anticipated to grow and likely to reach USD 44.04 billion by the year 2030. Thereby, the rising demand for minimally invasive procedures among the population is accelerating the market demand in the global market. However, the high cost of treatment impedes the growth of the market over the forecast period of 2022-2028. Also, rising investment in the research and development activities and growing healthcare expenditure are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Intracranial Aneurysm Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the surging demand for minimally invasive procedures, and the growing number of initiatives being undertaken by various organizations. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors

such as the presence of huge patient pool, as well as rising incidences of target diseases, would create lucrative growth prospects for the Intracranial Aneurysm Market across the Asia-Pacific region.
