Intravenous devices are the medical devices that are used to treat various diseases ranging from cancer to respiratory problems to ocular ailments and many more. Increasing awareness towards healthy lifestyle and increase in the number of hospitals are the factors contributing to the market growth. For instance, according to American Hospital Association (AHA), there will be 6,090 hospitals in the US and approximately 36,241,815 hospital admissions will be encountered by the year end 2021. However, growing concerns toward reused packaging impedes the growth of the market over the forecast period of 2021-2027.
