Abstracts

Global IoT Microcontroller Market is valued approximately USD 4.69 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 12.7% over the forecast period 2022-2029. Microcontrollers are tiny, self-contained computers that are accommodated on a microchip. They enable connectivity and control in all the things that are not being able to get connected onto the internet. The IoT Microcontroller market is expanding because of increasing demand for IoT connections and rising demand from the end-user industries.

For instance: according to Statista, the number of IoT connections is expected to go to 29 billion units, by the year end 2030 from 9.7 billion units, by the year end 2020. However, lack of industry standards and privacy issues and lack of data security may halt market growth.

The key regions considered for the Global IoT Microcontroller Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia Pacific dominated the space in terms of revenue, owing to increasing demand for smart wearables. Europe is expected to grow significantly during the forecast period, owing to favorable government initiatives.

Major market player included in this report are:

Texas Instruments Incorporated

Broadcom

Espressif Systems (Shanghai) Co., Ltd
Holtek Semiconductor Inc.
Infineon Technologies
Microchip Technology Inc.
Nuvoton Technology Corporation
