## Abstracts

Global Ischemic Optic Neuropathy Treatment Market is valued at approximately USD XX million in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. There are two forms of ischemic optic neuropathies (IONs): posterior ischemic optic neuropathy (PION) and anterior ischemic optic neuropathy (AION). Anterior ischemic optic neuropathy (AION) is caused by inflammation of the arteries that feed blood to the optic nerve, while non-anterior ischemic optic neuropathy is caused by other factors. Individuals are more likely to develop anterior ischemic optic neuropathy than posterior ischemic optic neuropathy. In the case of anterior ischemic optic neuropathy, immediate treatment is required to prevent vision loss in the affected eye, as it can also cause damage to the other eye in as little as 5 to 10 days. As the number of people with optic nerve problems rises, so does interest in the pharmaceuticals that treat them, supporting market growth. According to the World Health Organization (WHO), over 1.3 billion people suffer from eyesight problems. In the optometric area, growing interest in non-invasive medical procedures is also creating attractive prospects for industry players. Patients, after learning about the costs and hazards of surgeries, have a strong preference for pharmaceuticals over medical procedures, which is a major component in the market's growth. Several key manufacturers are taking strategic initiatives to expand their presence in the market. For instance, in January 2021, Eli Lilly and Company acquired Preval Therapeutics Inc. establishing a new mode of medication discovery and development. Similarly, The Brazilian Health Regulatory Agency (ANVISA - Agência Nacional de Vigilância Sanitária) approved Bausch Health Companies Inc.'s VYZULTA (latanoprostene bunod ophthalmic solution), 0.024 percent, in April 2021. Likewise,

Teva Pharmaceuticals announced a new strategic focus on the Japanese market in July 2020. Specialty assets and a portfolio of select generics that fulfil patients' medical needs are the focus of Japan's commercial endeavour. However, side effects associated with the treatment may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Ischemic Optic Neuropathy Treatment Market is considered for the key regions such as North America, Asia Pacific, Latin America, Europe, and Rest of the World (ROW). North America is the leading region across the world in terms of market share due to high availability of advanced treatment facilities and medical infrastructure in the region. Whereas Europe is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to R&D activities in the treatment of eye-related diseases.
