Global Isomalt Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Isomalt is a polyol (specific group of sugar alcohols) which is obtained from the hydrogenation of sugars from sugar cane. Isomalt offers mild sweetness. It is used for less -sugar and no added sugar confectionery products. Growing prevalence of cardiovascular diseases and rising food and beverages sector are key drivers for the growth of Isomalt market. For instance, according to World Health Organization (WHO)- in the year 2019, approximately 17.9 million people died from cardiovascular diseases (CVDs) which represents approximately 32% of all global deaths. Also, out of the 17 million premature deaths (under the age of 70) due to noncommunicable diseases in 2019, cardiovascular diseases accounts for approximately 38% death. Also, in September 2021, Archer-Daniels-Midland Company (ADM), an American multinational food processing and commodities trading has introduced a low Sugar Glucose Syrup (RSGS) named SweetRight in the US market. SweetRight combines low-sugar formulas, and also offers a viscosity equivalent to traditional corn syrup. Also, with shifting consumer preferences towards healthy food and increasing disposable income, the adoption & demand for Isomalt is likely to increase the market growth during the

forecast period. However, the presence of other sugar substitutes and high prices of isomalt products, impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Isomalt Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to increasing cases of diabetes and obesity in the region. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as abundance of raw materials and growing prevalence of diabetes in the region would create lucrative growth prospects for the Isomalt market across Asia-Pacific region.
