Abstracts

Global Isophthalonitrile (INP) Market is valued approximately USD XXX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2027. Isophthalonitrile is an organic compound with the formula $C_6H_4(CN)_2$. Isophthalonitrile is a pale or white solid having low solubility in water. Hydrogenation of the compound creates m-xylylenediamine, a curing agent in epoxy resins and a component of some urethanes. The growing demand for epoxy resins drives the growth of the Isophthalonitrile market. Increasing demand of epoxy resins is attributed by emerging need to protect concrete floors in commercial and industrial buildings. Thus, the rising construction of commercial and industrial buildings supports the market growth. For Instance: As per Statista, the construction spending in US amounted to USD 1.29 trillion in 2018, of which 77% of the spending was in private sector. However, volatile raw material prices impedes the growth of the market over the forecast period of 2020-2027.

The regional analysis of global Isophthalonitrile (INP) market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading/significant region across the world in terms of market share owing to the presence of large chemical manufacturing base in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising disposable income, rising urbanization would create lucrative growth prospects for the Isophthalonitrile (INP) market across Asia-Pacific region.
