Global Isopropyl Alcohol Market is valued at approximately USD XXXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2022-2028. Isopropyl Alcohol is a clear, colorless, flammable liquid that is one of the two isomers of propyl alcohol. It is extensively used for hand lotions, cosmetics and other after shaving lotions. Thus, growing demand in the end-use industries and rising demand for the product as an astringent and antiseptic are factors contributing to the market growth. For instance: according to Statista, the worldwide revenue for pharmaceuticals, went from USD 1,265 Billion, in the year 2020 to USD 1,423 Billion in the year 2021. However, ongoing covid-19 pandemic and variations in the prices impede the growth of the market over the forecast period of 2022-2028. Also, technological advancements and favorable government initiatives as well as strategic initiatives by the private players, and developments in the research & development institutes are likely to increase the growth of the market in the forecasting period.
