Abstracts

Global IT Asset Disposition Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028.

IT Asset Disposition is also known as ITAD is the practice of precisely discharging and disposing of hardware and electronic devices. The growing adoption of laptops, mobile devices, and various electronic gadgets needs a proper re-using or recycling of IT

equipment that cuts down the loss of e-waste that is creating a lucrative demand for IT asset disposition. The increasing implementation of regulatory norms and initiatives for environment safety, rising penetration of cloud-based technologies, electronics products, and BYOD trend, coupled with the rising inclination toward the development of energy-efficient products are the major factor attributing to the global market demand. For instance, according to Statista, in 2015, the consumer electronics and appliances segment was accounted for USD 204.23 billion and the amount is estimated to grow and reach USD 455.15 billion by 2022. Thereby, the growth of the consumer electronics and appliances sector is fueling the demand for the IT asset disposition, which, in turn, impetus the market growth in the approaching years. However, unauthorized standards and unsustainable practices and lack of awareness, and high service costs impede the growth of the market over the forecast period of 2022-2028. Also, rising demand for IT asset disposition from small and medium-sized enterprises and increasing sales of old equipment on auction websites or to employees is anticipated to act as a catalyzing factor for the market demand during the forecast period.

The key regions considered for the global IT Asset Disposition Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to higher adoption of novel technologies, and execution of stringent regulatory standards. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as rising initiatives for the conservation of the environment, as well as untapped opportunities in several emerging nations, would create lucrative growth prospects for the IT Asset Disposition market across the Asia-Pacific region.
