Abstracts

Global Krill Oil Market is valued at approximately USD 740.3 million in 2021 and is anticipated to grow with a healthy growth rate of more than 10.7% over the forecast period 2022-2029. Krill Oil is a dietary supplement sourced from a small shrimp-like crustacean named krill. Krill Oil contains omega-3 fatty acids eicosapentaenoic acid (EHA) and docosahexaenoic acid (DHA), the two essential omega-3 fats required for the efficient functioning of the body. It is available in different formats including tablets, soft gel, and capsules among others. The increasing prevalence of coronary heart disease and growing demand for protein & nutrition-rich foods as well as strategic initiatives from the market players are key factors accelerating the market growth.

The increasing prevalence of coronary heart disease is contributing to the growth of the Global Krill Oil Market. For instance, according to Centers for Disease Control and Prevention estimates – as of 2020, around 20.1 million adults aged 20 and older are affected by coronary heart disease. Additionally, approximately 382,820 individuals lost their lives due to coronary heart disease. Moreover, as per British Heart Foundation (BHF) estimates – in 2021, coronary heart disease (CHD) was estimated as the third highest cause of death, with around 66,000 individuals losing their lives due to CHD in

2021. Also, rising awareness towards the health benefits of Krill Oil and increasing consumption of dietary supplements would create a lucrative growth prospectus for the market over the forecast period. However, high costs associated with Krill Oil and decreasing population of aquatic animals stifle the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Krill Oil Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the dominance of leading market players and increasing consumption of dietary supplements in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising prevalence of coronary heart disease and increasing penetration of leading market players in the region.
