Global Laparoscopic Electrodes Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Laparoscopic electrodes, have application in laparoscopic procedures to coagulate, shrink or dissect tissues. These electrodes are used in minimal invasive surgeries. Laparoscopic electrodes are generally made from stainless steel. Laparoscopic electrodes are 33 cm long and used in combination with electro surgery pencils. Each electrode is packaged with a 4 mm shaft adapter to facilitate connection with 4 mm active cables. These electrodes are available in various styles. These assist in preventing injuries during an electro surgery. Rising prevalence of colorectal cancer and increasing preference towards minimally invasive surgeries as well as growing number of laparoscopic bariatric surgeries are driving the growth of Laparoscopic electrodes Market. For instance, according to American Cancer Society - colorectal cancer is the third most prevalent type of cancer in the United States, and as of 2022, there are 106,180 new cases of colon cancer and around 44,850 new cases of rectal cancer are reported in the country. Furthermore, as per online library of the Organisation for Economic Cooperation and Development (OECD) – during 2020, around 190 000 men and 150 000 women were diagnosed with colorectal cancer in the EU, and 156 000 people succumbed to it. Also, growing geriatric population and increasing technological advancements in healthcare industry are anticipated to act as a

catalyzing factor for the market demand during the forecast period. However, impact of outbreak of the COVID-19 on end use segment impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Laparoscopic Electrodes Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to presence of well-established healthcare infrastructure and increasing preference for minimally invasive surgeries. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the thriving growth of the end-use segments, increasing investments in healthcare infrastructure and rising penetration of global market players in the region, would create lucrative growth prospects for the Laparoscopic Electrodes Market across the North American region.
