Abstracts

Global Laparoscopy Device Market valued approximately USD 10.5 Billion in 2017 is anticipated to grow with a healthy growth rate of more than 5.92% over the forecast period 2018-2025. The Laparoscopy Device market is developing and expanding at a significant pace considering the global scenario. Laparoscopy is a minimally invasive surgical technique mainly preferred for surgeries related to the pancreas, liver, colon and bile duct. The laparoscopes are more like an apparatus with various parts including viewing device, CCD camera, energy supply devices, and lens cleaners. The market growth is primarily driven by increasing demand for bariatric surgery like gastric bypass and sleeve gastrectomy owing to the growing incidence of obesity. However, several post-operative risks with laparoscopy and requirement of trained professionals are expected to hamper the market growth considering the forthcoming years.

The regional analysis of Global Laparoscopy Device Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the fastest growing region across the world in terms of market share.
