Abstracts

Global Laundry Care Market is valued at approximately USD 25 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.00 % over the forecast period 2022-2028. Laundry Care is a service in a hotel that washes and irons clothes for guests. The laundry service will wash, dry, and iron your clothes. Includes the process of washing (usually with water containing detergents or other chemicals), agitation, rinsing, drying, pressing (ironing), and folding. The rising e-commerce giants and retail stores and emergence of detergent pods have led to the adoption of Laundry Care across the forecast period. For Instance: as Dropps is one of the leading Laundry Care products brands, which introduced plastic-free laundry detergent pods packaged in recyclable and compostable boxes, in November 2020, Ariel, one of the leading detergent brands, announced the launch of single-use tablets called PODS, as pre-dosed washing capsules, filled with concentrate liquid. Also, with the increasing penetration of social media and growing demand for sustainability and surging demand for organic home care products, the adoption & demand for Laundry Care is likely to increase the market growth during the forecast period. However, stringent regulations impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Laundry Care Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the strong presence of leading Laundry Care brands. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as rising disposable income, increasing sales of organic and biodegradable detergents

would create lucrative growth prospects for the Laundry Care Market across Asia-Pacific region.
