Abstracts

Global Law Enforcement And Military Clothing Market is valued approximately USD 2.94 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 6% over the forecast period 2020-2027. Law Enforcement And Military Clothing are used by departments such as Army, Navy, Air force and Police Force as their uniform which provides them comfort and protection in their different working conditions . The increasing use of nanotechnology owing to technological advancement, ongoing wars in regions like Iran, Yemen, Syria and others leading to recruitment large number of defense personnel and large investments by market players in technology advancement and expansion are expected to fuel the demand in the forecast period. For Instance: in 2019, Lenzing AG invested USD 67 million in the expansion and modernization of its plant at Lenzing, Austria and in February 2019, BAE Systems had announced the investment in expansion of operations in Manchester, New Hampshire. However, complicated manufacturing process and availability of internal substitutes impedes the growth of the market over the forecast period of 2020-2027. Also, increasing numbers of natural calamities such as floods, tsunamis and others are expected to boost the demand as law enforcement and military services are required for disaster management which is likely to increase the market growth during the forecast period.

The regional analysis of global Law Enforcement And Military Clothing market is considered for the key regions such as Asia Pacific, North America, Europe, Latin

America and Rest of the World. Europe is the leading/significant region across the world in terms of market share owing to larger investment as part of GDP in defense activities by the countries like France, Germany and others which leads to large recruitment of defense personnel in law enforcement and military. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as growing insurgency incidents, increasing defense budget and terrorism in the region would create lucrative growth prospects for the Law Enforcement And Military Clothing market across Asia-Pacific region.
