## **Abstracts**

Global Lawful Interception Market is valued approximately at USD 3 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 19.7% over the forecast period 2020-2026. Lawful Interception (LI) is a process in which a network operator or service provider provides law enforcement officials an access to the communication of private individuals or organizations. In lawful interception process, law enforcement agencies (LEAs) conduct electronic surveillance as authorized by jurisdiction or administration to track illegal activities. The increase in subversive activities and terrorism and increase in cybercrimes in the era of digitalization are the few factors responsible for growth of the market over the forecast period. For instance, as per Statista, the number of terrorist's activities in 2012 was 6,771 and has risen to 8093 number of terrorism activities in 2018, globally. Additionally, as per Herjavec Group, in 2018 Marriott has hacked around 500 million user accounts due to cyber-attacks. Also, Yahoo was suffered around 3 billion user accounts by cyber-attacks in 2017. However, security and privacy of intercepted data is the major factor restraining the growth of global Lawful Interception market during the forecast period.

The regional analysis of global Lawful Interception market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World due to well-established infrastructures, Internet Service Providers (ISPs) and Communication Service Providers (CSPs) that generate a huge demand for lawful interception solutions in the region.
