Abstracts

Global Leak Detection Market is valued approximately USD 1.95 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 7.8 % over the forecast period 2020-2027. Leak Detection System & Services in Gas and Oil industry has become an essential part of safety measures to avert the calamities that have taken place in the past. To fulfill the increasing demand of gas and oil, new pipelines are being constructed along with the expansion of the current pipelines. The factor driving the demand for the leak detection market is the rise in the number of incidents of oil and gas leakages in pipelines and storage tanks at production facilities with the increase in pipelines, more storage facilities are needed which will also be requiring leak detection system, and the stringent rules by the government to mandate leak detection systems is set to drive the market to the peak. In addition to that, the exploration for oil wells has initiated the construction and development of pipelines and storage facilities across the globe. As of November 2020, Neptune Energy started the first gas production from the Adorf Carboniferous development in northwestern Germany. In February 2020. Gas leak detections become challenging in open and ventilated facilities, hence, effective gas leak detectors are needed, issues such as lack of adequate information associated with gas leak detectors and the expensive hardware for the detectors are significantly hampering the adoption of leak detection market. Lack of technological advancements in offshore leak detection systems can also boost the market of the leak detection systems.

The regional analysis of global Leak Detection market is considered for the key regions

such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the increase in the global demand for oil and gas. Whereas Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as, increase in the demand lead to oil exploration which, in turn, attracts investments pertaining to natural gas production projects. Would create lucrative growth prospects for the global Leak Detection market across Asia-Pacific region.
