## Abstracts

Global Left Atrial Appendage (LAA) Closure Device Market is valued approximately at USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Increasing research programs and awareness campaigns and better safety, efficiency, and minimization in bleeding with the use of epicardial LAA devices are the factors which are driving the growth of Left Atrial Appendage (LAA) Closure Device market. Furthermore, increasing development of advanced surgical solutions will be anticipating the growth of market in forecasted period. For instance: In 2020, Append medical developed transcatheter LAA occlusion technology known as Appligator implant-free left atrial appendage occlusion device. This suture delivery device eliminates the need for everlasting implants and grants a surgical suture closure without requiring an open chest method. However, stringent government policies towards LAA closure devices may impede market growth over the forecast period of 2021-2027.
