Abstracts

Global Levofloxacin Market is valued at approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.1% over the forecast period 2022-2029. Levofloxacin is an antibiotic used to kill germs within the body that is sold under the trade name Levaquin. Levofloxacin and other fluoroquinolone antimicrobials block DNA gyrase and topoisomerase IV in bacteria as part of their mechanism of action. It is offered as a tablet and as an injectable medication. This medication is used to diagnose several illnesses, including acute bacterial sinusitis, chronic prostatitis, urinary tract infections, and pneumonia. The market growth is driven by the growing Incidence of Bacterial Infections and the rising number of Baby Boomers are the key factors responsible for the market growth.

The World Health Organization's Global Tuberculosis Report 2021 states that in October 2021, South-East Asia (43%), Africa (25%), and the Western Pacific (18%) had the highest numbers of tuberculosis cases, while the Eastern Mediterranean (8.3%), Americas (3.0%), and Europe (2.3%) had the lowest percentages. Statistics show that the prevalence of tuberculosis is high worldwide, which is considered to boost market expansion because Levofloxacin is frequently used to treat the disease. However, a lack of Awareness Associated with Infectious diseases stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Levofloxacin Market study includes Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is dominating the worldwide revenue owing to technological advancements and

the increasing prevalence of chronic diseases. However, Asia Pacific is expected to be the fastest-growing region in the forecast years due to major expansion in manufacturing pharmacies.

Major market players included in this report are:

Dr. Reddy's Laboratories Ltd
