## **Abstracts**

Global Light Gauge Steel Framing Market is valued approximately USD 5.44 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 11.1 % over the forecast period 2020-2027. Light Gauge Steel Framing consist of structural frames fabricated through cold formed steel sections, to protect from corrosion they are made from a mixture of zinc and aluminum or coated with zinc. It can be used to construct a structure, such as load-bearing exterior walls, non-load bearing interior walls, floor joists, curtain walls, and roof trusses. It allows quick building and also provides larger space comparatively to wood frame construction. It is being developed with various innovations, in terms of technology like improved safety, strength, and stability. It also takes lesser time to complete. The large number of commercial buildings, such as hotels, retail stores, medical centers, garages, and warehouses boost the market growth. Further, increasing investments in large industries along with the rise in construction activities and modern, eco-friendly designs has led the adoption of Light Gauge Steel Framing across the forecast period. for instance: in 2021, Apax Partners backed Gritec bought StrucSoft Solutions with a focus on the manufacturing, architecture, construction and engineering industries. However, high maintenance costs impede the growth of the market over the forecast period of 2020-2027. Also, with being pollution-free and a source of raw material for green building technology, the adoption & demand for Light Gauge Steel Framing is likely to increase.

The regional analysis of global Light Gauge Steel Framing market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading/significant region across the world in terms of market

share owing to increase in construction of residential and non-residential buildings in developing countries like India & China . Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising disposable income, customer awareness regarding eco-friendly and less completion time would create lucrative growth prospects for the Light Gauge Steel Framing market across Asia-Pacific region.
