Global Light Sensor Market is valued approximately USD 3.16 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 10.8% over the forecast period 2021-2027. Light sensor is an electrical device used to measure and convert physical measurements into analog signal. Laser sensor works on the basis of the theory of triangulation principle. The increasing use of laser sensors in manufacturing and automation sector, low cost and high speed electronic circuits, innovative signal processing methods and advanced technological manufacturing are some of the factors driving the light sensor market across the world. With the growth in use of electronics, sensor technologies, smart homes, etc. makes light detector a preferred technology as it detects the presence of multiplexing, electromagnetic interference and superior sensitivity in the devices. According to Emerson, the global factory automation market is expected to rise from 3% in 2019 to 3.5 percent by 2021, indicating that market demand is expected to remain stable. Furthermore, future trends in the maritime and offshore industries are expected to include the use of laser sensor technology advancement. LADAR (Laser Detection and Ranging) is primarily a laser-based navigational aid that combines long-distance object detection with high-accuracy measurement to provide users with a complete 2D/3D/4D (3 D plus time) perspective for optimum maritime information. However, restrictions on operating temperature, lack of technological advancement and high sensitivity is hampering the growth of the market over the forecast period of 2021-2027. Also, change in market regulation, new product launches

and value chain optimization sensor is likely to boost the market growth during the forecast period.

Globally, Asia Pacific holds the highest market share across the world, as the population is growing the demand for electronic goods is also increasing and the growth of automobile manufacturers in the region is highly influencing the market of laser sensor in the region. Whereas, North America is also anticipated to exhibit highest growth rate over the forecast period 2021-2027.
