## **Abstracts**

Global Liposome Drug Delivery Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Liposomes are becoming increasingly used as nano-carriers for a variety of pharmacological purposes. Phospholipid and cholesterol compositions are becoming more helpful in liposome medication delivery. Nanotechnology, on the other hand, is improving liposome medication delivery. The factors that propelled the growth of liposome drug delivery market are rise in cases of chronic conditions and increased disease control in patients suffering from colorectal cancer. For instance, as per cancer.net, in the United States, an estimated 151,030 persons will be diagnosed with colorectal cancer this year. 106,180 new cases of colon cancer and 44,850 new cases of rectal cancer were reported. Colorectal cancer is the third most often diagnosed cancer worldwide. In 2020, it is expected that 1,880,725 individuals will be diagnosed with colorectal cancer. Also, According to World Health Organization data from 2018, cardiovascular disease (CVD) was the top cause of death in Mexico in 2016, accounting for approximately 24% of all fatalities. According to the American Heart Association, cardiovascular disease (CVD) was the underlying cause of death in

840,678 fatalities in the United States in 2016. However, high costs involved in the development of drug delivery systems impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Liposome Drug Delivery Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is leading the market share globally, owing to increasing research and development and rise in cancer prevalence in this region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as huge investment in research and development, rapidly aging population would create lucrative growth prospects for the Liposome Drug Delivery market across Asia-Pacific region.
