Global Liquid Crystal Thermometers Market is valued approximately at USD XX billion in 2019 and is anticipated to grow with a growth rate of more than XX% over the forecast period 2020-2027. Liquid Crystal Thermometers indicate temperature level with rainbow colors within the range and black when temperature reaches out of range and is used to measure heat transfer pattern. The range of temperature they are formulated to react to is -33°C to 120°C. Being very sensitive to temperature, they are used to measure the aquarium temperature to provide warmth to fishes, snails and other creatures. Liquid Crystal Thermometers are also used to measure the temperature of the greenhouse gases as it is easy to interpret looking at the colors of the meter motivating the market growth. Moreover, to monitor the fever within the human body consistently becomes easier due to color pattern shown by it, enhancing the market growth.

For Novel Coronavirus Disease, fever is the initial major symptom to be detected, due to which the Global Thermometer Market has boomed with increased demand. However, since Coronavirus disease is a spreading disease, Infrared Thermometers are used at much wider scale.

Even so, the use of Liquid Crystal Thermometers for some office purpose to measure gas is increased due to its property to show temperature through color. Temperature changes by heat flow are measured accurately by Liquid Crystal Thermometer boosting the market growth. However, availability of other substitutes in the market is the

restraining factor which impedes the growth of the market over the forecast period of 2020-2027.

The regional analysis of global Liquid Crystal Thermometers market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world due to higher number of aquarium setups. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as cost effectiveness and rise in need to monitor greenhouse emission gas would create lucrative growth prospects for the Liquid Crystal Thermometers market across Asia-Pacific region.
