Abstracts

Global Liquid Fertilizers Market is valued approximately at USD 2.4 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 4.4% over the forecast period 2021-2027. Liquid fertilizers are fluids containing plant nutrients used to improve the quality and quantity of plant growth. Liquid fertilizers provide the right amount of nutrients to the plant at the required time. This helps in reducing the negative impact; these advantages help drive the market. Rapid rise in demand for high-efficiency fertilizers, ease of use and application are also major driving factors for the market. But limited supplies of liquid fertilizers, logistics issues and excessive handling costs are some restraining factors for the market. Moreover, lack of awareness among farmers regarding proper usage of liquid fertilizers is a major restraining factor for the market. The surge in demand of food requirements can be fulfilled with high agricultural output which automatically increases the demand for liquid fertilizers and thus giving market the opportunities to grow in the forecasted period. Investments by governments and private players, increasing research and development activities are also giving market the opportunities. For instance the Tamil Nadu state government promoted liquid fertilizer, supplying it to the farmers of six Delta districts of Tamil Nadu for raising paddy cultivation in 1 Lakh acres under the Kuruvai special package scheme is expected to popularize the usage of liquid bio-fertilizer.

The key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of global Liquid Fertilizers market. Asia Pacific is the largest market with a total share of 38.4% in the global market

because of factors such as rising concern over the current pattern of liquid fertilizer use, heavy reliance on nitrogenous liquid fertilizer. China holds the largest share in the region with a total share of 46.5%, while Australia is expected to witness the fastest growth. Moreover, the demand for liquid fertilizer is rising rapidly in Latin America.
