Abstracts

Global Liquid Waste Management Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. It is very cumbersome to treat liquid waste as compared to other waste type like solid waste as it gets easily mixed with the surrounding environment. Inappropriate liquid waste management can result in water pollution. It can result in contamination of surface water and lead to water borne diseases. Liquid waste management companies offer various services to treat and dispose of liquid water waste. Growing prevalence of water borne diseases and rising awareness towards hygiene & environment protection are key drivers for the growth of Liquid Waste Management market. For instance, according to India Water Portal- as of 2019, about 37.7 million Indians are affected by waterborne diseases, and 1.5 million children die of diarrhea and Water borne diseases cause an economic burden of USD 600 million a year. Also, as per Centers for Disease Control and Prevention, USA- as of 2020, about 7.2 million Americans get sick every year from diseases spread through water. Also, in

April 2019 Waste Management, is an U.S.-headquartered waste management company has acquired Advanced Disposal, Houston, Texas, provider of waste management environmental services for USD 4.9 Billion. Furthermore, In December 2021, Veolia, France based environmental Services company has awarded contract from Saudi Arabia Government for a 7-year Management Contract for water and wastewater services in the capital Riyadh and 22 outlying municipalities. Also, with favorable government policies and rapid urbanization in emerging economies, the adoption & demand for Liquid Waste Management is likely to increase the market growth during the forecast period. However, high capital requirement and lack of penetration from emerging economies impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Liquid Waste Management Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading waste management companies and favorable government regulations in the region. Whereas Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as rapid urbanization and increasing penetration of leading waste management companies in the region would create lucrative growth prospects for the Liquid Waste Management Market across Asia-Pacific region.
