## **Abstracts**

Global Lithopone Market is valued approximately USD 169.8 million in 2019 and is anticipated to grow with a healthy growth rate of more than 3.3 % over the forecast period 2020-2027. Lithopone is an inorganic white pigment, produced from co-precipitation of Barium sulfate ( $\text{BaSO}_4$ ) and Zinc sulfide ( $\text{ZnS}$ ). As a white pigment, it is a cost-effective substitute of Titanium Dioxide ( $\text{TiO}_2$ ). Major features of Lithopone include high brightness and performance under UV exposure, less wetting agent requirement to achieve optimum wetting of its surface and it is commercially graded on the basis of amount of  $\text{ZnS}$ . Its grades include 28%, 30%, and 60%  $\text{ZnS}$ . Lithopone is presently applied in various paint formulations, road marking paints, jointing compounds, and putties. It is used in plastics to increase its outdoor life by providing the plastic product's UV tolerance. It is also used in leather industry and in the production of linoleum floorings. Developments in the paints & coatings industry and increase in plastic product manufacturing process will drive the market share globally. Further, increasing investments in bioplastics, increasing manufacturing and automotive industries along with construction industry has led the adoption of Lithopone across the forecast period. For Instance: as per the World Bank data of 2019, China is the largest exporter of plastics, thus increasing the lithopone market globally. However, availability of numerous white pigment substitutes impedes the growth of the market over the forecast period of 2020-2027. Also, with the developing new Lithopone formulations, the adoption & demand for Lithopone is likely to increase.

The regional analysis of global Lithopone market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading/significant region across the world in terms of market share owing to the easy availability, export of products around the world developed automotive and

construction industries. For instance: The Shanghai Yuefang Industry & Trade Development Co., Ltd., is a company based out of China that offers more than 30 components of lithopone and similar components, thus growing market globally. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising disposable income, urbanization and industrial developments would create lucrative growth prospects for the Lithopone market across Asia-Pacific region.
