Abstracts

Global Logistics Insurance Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028.

The Logistics Insurance can be defined as a tailor-made insurance product which protects the insured against physical damage or loss of goods while being transported by land, sea, or air. Logistics Insurance covers loss due to improper packing, infestation, customs rejection, and cargo abandonment etc. The growing Logistics & Transportation Sector and increasing penetration of E-commerce platforms as well as recent Strategic initiatives from leading market players are factors that are accelerating the global market demand. For instance, according to Statista - In 2020, the logistics industry worldwide was estimated at USD 5.85 trillion, and the logistics industry is projected to cross USD 6.94 trillion by 2024. Furthermore, leading market players are working towards partnership activities to digitalize the insurance distribution process. For instance, in September 2021 Kenyan insurance technology company, Lami Technologies entered in a partnership with Nairobi, Kenya based tech-logistics company, Sendy Limited. This partnership would enable transporters in Kenya to access simple, hassle-free, and affordable insurance products customized on a per-trip basis. Moreover, in October 2021, Illinois, USA based transportation-related insurance broker Roanoke Insurance Group, Inc. partnered with Oxford, Maryland, US based Software company Redkik Inc. Under this partnership both the players would be offering on-demand, per shipment insurance with instantaneous premium quotations at the time of freight booking, and with dynamic pricing option. Also, growing Import Export

activities in post covid era and increasing digitization of insurance distribution platforms are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, a lack of awareness towards logistics insurance policies coupled with high premium rates impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Logistics Insurance Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing logistics and transportation sector and presence of leading insurance provider in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the thriving import and export activities and, rising emergence of leading market players in the region would create lucrative growth prospects for the global Logistics Insurance Market across the Asia Pacific region.
