Abstracts

Global M-Commerce Market is valued approximately at USD xxx billion in 2022 and is anticipated to grow with a healthy growth rate of more than xxx over the forecast period 2023-2030. M-commerce or 'mobile commerce,' refers to the purchase and sale of products and services using mobile devices such as smartphones and tablets. It entails using mobile applications or mobile-optimized websites to perform online transactions, browse items, make payments and access other e-commerce operations. Market grows due to increased smartphone usage, internet penetration, and affordability. Companies are using mobile platforms to expand their customer base and increase profitability. The market is highly competitive, with global players investing heavily and offering promotions. The M-commerce market is expected to continue growing and evolving in the future.

The increasing global smartphone penetration has greatly influenced the M-commerce market by providing more people with convenient access to the internet and online transactions. This has led to a significant surge in M-commerce activities. According to the Statista, in 2022 global smartphone shipment reached approximately 1.2 billion units, approximately 68 percent of the world's population were smartphone users. As of 2022, the number of smartphone subscriptions was estimated to be around 6.5 billion, and it is projected to rise to nearly 8 billion by 2028. Additionally, increasing the

awareness of M-Commerce through cashback and offer discounts on mobile wallets and credit/debit cards provides lucrative opportunities to the market growth. However, lack of high number mobile compatible websites and slow internet speed in developing countries stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global M-Commerce Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 with largest market share owing to the high internet penetration rates and the tech-savvy environment in the region. Also, rising number of mobile phone user in the region that anticipated to support the market growth. Asia Pacific is expected to fastest growing significantly during the forecast period, owing to the combination of a large population, technological advancements, availability of mobile payment solutions, shifting consumer behavior, and innovative companies has propelled the Asia Pacific region to become the highest growing region in the M-commerce market.
