Abstracts

Global Machine Vision Camera Market is valued approximately at USD 9.58 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 7.3% over the forecast period 2020-2026. Machine Vision Camera are used by various industries for the depth investigation and analysis across sectors like defense, healthcare, robotics and many more. Mostly these are used for border securities to detect target at night or in other low conditions, defense surveillance, in healthcare and medical field for applications such as diagnosing skin cancer. Due to the development in Artificial Intelligence, an inclining trend can be seen in the growth of Machine Vision Cameras. Factors such as technological development increase the demand for more precise and accurate outcomes and practical images. Increase in the use of artificial intelligence is the driving factor for the market growth. For Instance: As per McKinsey in 2019, use of AI across the globe has increased year on year by approximately 25%. The world tending towards digitization, and all the new inventions taking place in robotics require detailed study for the research and analysis of various parts and this is where machine vision cameras will be useful. Moreover, the COVID-19 pandemic has provided significant growth to the Machine Vision camera market. The demand for it will be increasing in the near future due to its requirement in robotics field. The world is tending

towards automation. Because of the COVID pandemics people are forced to stay at home. So for the functions like delivery, self-automated cars, etc. the use of this cameras for manufacturing of such robots will increase drastically. Apart from that in the medical sector, machine vision cameras may be useful during research of the various viruses and bacteria coming across. The restraining factor here may be the immediate delay in the sale of these machine vision cameras as the economy has declined drastically due to this global pandemic. However, regional laws and standards impedes the growth of the market over the forecast period of 2020-2026.

The regional analysis of Global Machine Vision Camera market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world in terms of market share owing to the machine vision cameras and presence of major market players in the region as major factors like raw material, technologies as well as resources are available adequately in this region. Need for more practical results and urge for 3D pictures have led to an increase in the market size.
