Abstracts

Global Managed Pressure Drilling Services Market is valued approximately at USD 2.19 Billion in 2019 and is anticipated to grow with a healthy growth rate of more than 4.20% over the forecast period 2020-2027. Managed pressure drilling is referred as a drilling process which is used to efficiently control the annual pressure profile all over the wellbore. It provides closed-loop circulation system which manages and balanced pore pressure, formation fracture pressure and a bottom hole pressure in the wellbore. Due to such features of managed pressure drilling services, the market is expected to grow over the forecast years with rapid growth in oil & gas industries. For instance: According to International Energy Agency, the global crude oil production accounted for 80,622,000 barrel per day (b/d) in the year 2019. United states was also the leading producer of crude oil among both developed and developing nations. According to International Energy Agency, the crude oil production accounted for about 10.99 million barrel per day (b/d) in the year 2018 which rose to around 12.33 million barrel per day (b/d) in the year 2019 registering a growth of about 11%. Managed pressure drilling is gaining application in oil & gas extraction plants to improve wellbore stability, improve rate of penetration while drilling and reducing influx & losses. In addition, need for optimized drilling operation is expected to propel the growth of market. However, high cost of managed pressure drilling services is the factor hampering the market growth.

The regional analysis of global Managed Pressure Drilling Services Market is

considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the rapid growth in production of crude oil in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as increasing number of mature wells would create lucrative growth prospects for the Managed Pressure Drilling Services Market across Asia-Pacific region.
