## **Abstracts**

Global Manganese Iron Alloy Market is valued approximately USD XX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2027. Manganese Iron Alloy also known as ferromanganese has properties such as higher durability, ductility, lighter in weight and better resistance. The alloy is used for both making and oxidation of steel enhancing its durability as well as effectiveness. Drivers of Manganese Iron Alloy are rising applications in electric vehicles and technological development in the mining furnace and industry as the ferromanganese are extensively used in in these industries. Invasion of raw materials is continuously in progress to enhance the supply and attain the demand. For instance: More than 1.1 Billion metric tons of manganese mineral reserves were explored across China during 2011-2018 as per China Natural Resource News resulting the enhance in trade across countries. Due to COVID-19 Pandemic, disruption is observed in the Global Manganese Iron Alloy Market due to imposition on exports and non-functionality of various industries. However, in long run, the growth in the economies of both developed and developing countries exceeds the growth of market. Further, growth in the demand of Lithium-ion batteries boost the growth of Manganese Iron Alloy. However, availability of substitutes along with the volatility of raw materials are the most restraining factors that impede the growth of the market over the forecast period of 2020-2027.

The regional analysis of global Manganese Iron Alloy market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the

World. Asia Pacific is the leading/significant region across the world due to availability of raw material and technological developments. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rise in use of Electric Vehicles and Lithium-ion batteries would create lucrative growth prospects for the Manganese Iron Alloy market across Asia-Pacific region.
