Global Manometry System Market is valued at approximately USD 157.3 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.4 % over the forecast period 2021-2027. Manometry System is a diagnostic procedure that is conducted to make measurement of the pressure or impedance exerted by muscles inside body lumen like nasal cavity, rectum, and esophagus. The expansion in the base of geriatric population and investment in modern health infrastructure has led to the adoption of Manometry System across the forecast period. For Instance: as per the US health care, the 2020 digital health market was valued somewhere between \$96.5 and \$111.4 billion. Also, with the increasing number of patients, the adoption & demand for Manometry System is likely to increase the market growth during the forecast period. However, lack of skilled Professionals impedes the growth of the market over the forecast period of 2021-2027.
