Global Marine Deck Cranes Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Marine Deck Cranes refer to material handling devices utilized for effective loading & unloading of cargo at Ports. In these cranes, a hoisting motor is used to lift material as well as a luffing motor for raising or lowering the jib, and a slewing motor for rotating the crane. The growing logistics & transportation sector and rising investment in Port infrastructure development as well as strategic initiatives from leading market players are key factors accelerating the market growth.

According to Statista – during 2020, the global logistics industry in India was estimated at USD 5730 billion and, the logistics industry is projected to grow to USD 6800 billion by 2024. In addition, as per Statista - In 2019, the cross-border online shopping sector was estimated at USD 579 billion, and the market is projected to grow to USD 2250 billion by 2026. Also, rising cross border trade in post pandemic era and growing automation in Logistics & transportation sector would create lucrative growth prospectus for the market over the forecast period. However, high costs associated with marine

Deck Cranes and volatile cost of raw materials impede the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Marine Deck Cranes Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region in terms of market share owing to presence of key market players & rising automation in logistics and transportation sector in the region. Whereas, Asia Pacific is expected to grow significantly during the forecast period, owing to factors such as rising investment in port infrastructure as well as growing cross border trade in the region.
