Abstracts

Global Mass Notification Systems Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Mass notification systems are used to communicate real-time information regarding emergencies, like fire, terrorist activities, chemical spills, and natural disasters with residents and alert them regarding response to a threat or emergency. Growing prevalence of security related concerns and rising incidence of disasters are key drivers for the growth of Mass Notification Systems market. For instance, according to National Oceanic and Atmospheric Administration, USA in 2021, the U.S. experienced 20 separate billion-dollar weather and climate disasters, putting 2021 in second place for the most disasters in a calendar year, behind the record 22

separate billion-dollar events in 2020. Also, in March 2021 ICEsoft Technologies, a Canada based commercial Java open-source technology company in collaboration with the District of Tofino, with the help of Voyent Alert! Mass Notification Service has developed a tsunami monitoring and community alerting solution that helps in alerting citizens during a tsunami. Additionally, with the increasing implementation of new technologies and favorable government policies & regulations, the adoption & demand for Mass Notification Systems is likely to increase the market growth during the forecast period. However, rising prevalence of cyberattacks impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Mass Notification Systems Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading market players and favorable government policies in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as growing industrialization and increasing penetration of advanced technologies in the region would create lucrative growth prospects for the Mass Notification Systems Market across Asia-Pacific region.
