Abstracts

Global Mastopexy Market is valued at approximately USD 3.2 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 6.3% over the forecast period 2022-2029. Mastopexy procedures are performed for the following reason: As people age, their breasts alter, becoming less elastic and firm. These sorts of breast alterations can occur for a variety of reasons, including pregnancy, when the ligaments supporting the breasts may expand and the breasts become heavier and larger. The demand for cosmetic breast-raising treatments is predicted to increase, which is one of the many factors likely to contribute to the expansion.

According to a report from the Aesthetic Society from April 2022, the yearly data for breast surgical operations in 2021 showed a 48% increase from 2020. In 2021, 365,000 breast implants were carried out. Additionally, according to Statista, the market for medical tourism was estimated to be worth USD 54.4 billion in 2020 and was expected to grow to more than USD 200 billion by 2027. Although the coronavirus epidemic has stopped medical tourism, it was predicted that the business will return and grow significantly in the years to come. However, Post-surgery complications stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Mastopexy Market study includes Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is leading the overall market share owing to increased disposable income and rising demand for aesthetic procedures. However, Asia Pacific is expected to be the

fastest growing region due to an increase in the number of surgical procedures increase in the development of breast implants to fulfil the unmet medical needs.

Major market players included in this report are:

Polytech Health & Aesthetics GmbH

Allergan Plc.

Cynosure

Mentor Word Wide, LLC

Solta Medical

Lipoclastic

Galderma
