Global Media Gateway Market is valued approximately USD 2 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 5.30 % over the forecast period 2019-2026. Media gateway is a service or translation device that converts media streams. Media gateway is used in the core network of the telecom network to offer internetworking and transformation between the media streams and dissimilar network communication networks. Leading factor of the marketplace are growing demand for high-quality transmission over distinct networks and modular structure of media gateways offering high flexibility to legacy systems. Apart from this, session border functionality of integrated media gateways coupled with wide adoption of 4g technology and the emergence of 5g is expected to create significant growth opportunity in the market over the forecast period. However, adoption of Softswitches impedes the growth of the market over the forecast period of 2019-2026.
