Global Medical Automation Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Medical Automation can be defined as use of different software that promotes efficiency in the provision of medical services. Medical automation has applications across different areas in healthcare such as Therapeutic Automation, Medical Automation, Lab & and Pharmacy Automation among others. The growing incidences of cardiovascular disease (CVD) and rising number of clinical research as well as recent approvals from regulatory authorities are factors that are accelerating the global market demand. For instance, according to World Health Organization (WHO) estimates – in 2019, globally around 17.9 million people lost their lives from cardiovascular diseases in 2019, witnessing for around 32% of all global deaths. Moreover, around ? of CVD deaths took place in low- and middle-income countries. Furthermore, recent product approvals from regulatory authorities would positively influence the Medical Automation Market. For instance, in October 2021, USA based Medtronic plc, the global leader in medical technology, received CE (Conformit? Europ?enne) Mark for its Hugo™ robotic-assisted surgery (RAS) system. With CE approval, the company authorized to the sale the system in Europe. Also, growing healthcare sector in emerging markets and increasing adoption of artificial intelligence in healthcare sector are anticipated to act as a catalyzing factor for the market demand

during the forecast period. However, a high cost of automation impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Medical Automation Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the increasing investment from government authorities and presence of leading market players.
