Abstracts

Global Medical Crutches Market is valued approximately USD 683.10 million in 2021 and is anticipated to grow with a healthy growth rate of more than 6.50% over the forecast period 2022-2029. Medical crutches are a form of mobility tool that make it easier for people to shift their weight from their legs to their upper bodies. People who suffer from temporary disabilities or long-term disabilities use these medical crutches. The Medical Crutches market is expanding because of factors such as high prevalence of bone related diseases such as osteoporosis, arthritis and other and significant number of people suffering from non - fatal injuries. However, availability of alternatives such as knee walker and wheelchairs may halt market growth.

The Organization for Economic Cooperation and Development (OECD) reports that the countries with the greatest rates of traffic accidents in 2021 were Japan, Korea, Germany, and Italy.

In Japan, there were around 361,562 injuries from traffic accidents in 2021, compared to 323,129 injuries in Germany. Additionally, the UNICEF reported that around 240 million children be born with a disability in November 2021. Additionally, according to the WHO, vehicle traffic accidents are the number one killer of children. As a result, high prevalence of accidents and disabilities is augmenting the market growth. In addition, high incidence of limb loss and product launches activities is creating a lucrative growth

to the market.

The key regions considered for the Global Medical Crutches Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to increasingly ageing population, the presence of favorable government regulations, and the development of advanced healthcare infrastructure are some of the factors causing its large share. Whereas Asia Pacific is expected to grow with a highest CAGR during the forecast period, owing to factors such as rising geriatric and target populations, rising road accidents, geographic expansion of key players, and active participation of government and nonprofit organizations in the market space.
