Abstracts

Global Medical Goggle Market is valued at approximately USD XX million in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Medical goggles, also known as medical safety goggles or medical protection goggles, are worn by doctors, nurses, medical technicians, and other employees to protect their eyes from aerosols and liquids. It protects the eyes from impact, dust, splashes, and fumes. The implementation of severe government laws pertaining to the safety of healthcare staff is a major driving force in the worldwide medical goggle market. Furthermore, due to the rapid spread of the infectious coronavirus, there is an increase in the requirement and demand for medical goggles in the healthcare sector, which propels the market forward. Furthermore, an increase in healthcare workers' understanding of the benefits of utilizing medical goggles contributes significantly to market growth. Medical goggles are becoming increasingly important to healthcare workers in developed countries, which is propelling the global medical goggles market forward. Furthermore, in a potentially sensitive setting, several countries require surgeons, doctors, and other healthcare personnel to wear medical goggles. Protective eyewear is necessary for Class 3 and Class 4 laser use where ocular radiation is likely, according to the American National Standards Institute (ANSI). These regulations have a substantial impact on market growth. However, high taxations on protective goggles may impede market growth over the forecast period of 2021-2027.

The regional analysis of the Global Medical Goggle Market is considered for the key

regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World (ROW). Asia Pacific is the leading region across the world in terms of market share due to rise in prevalence of infectious diseases and COVID-19 burden in the region. Whereas North America is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to rise in healthcare expenditure, and rise in government spending across the region.
