Abstracts

Global Medical Nitroglycerin Sprays Market is valued approximately USD 94.5 million in 2019 and is anticipated to grow with a healthy growth rate of more than 4.2 % over the forecast period 2020-2027. Nitroglycerin spray is utilized to treat episodes of angina, or chest pain, in people who have coronary artery disease. It is also used just before activities that may cause episodes of angina in order to prevent the angina from occurring. Nitroglycerin belongs to a class of medications called vasodilators. It works by relaxing the blood vessels, so the heart does not need to work as hard and therefore does not need as much oxygen. Increasing prevalence of Angina Pectoris drives the market growth. The disease is caused by an imbalance between myocardial blood supply and oxygen demand and is a common symptom among Coronary artery Disease patients. As of 2019, the total number of prevalent diagnoses cases for patients more than 18 years of age was over 6 million. Further, increasing prevalence of sedentary lifestyle creating major health problems augments the market growth. Also, cost effectiveness of the sprays in comparison to sublingual tablets fosters higher market demand. Further, advantages such as minimal side effects and multiple dosage capacity such as these sprays offer capacity between 60 doses per bottle to 230 doses per bottle. However, ineffectiveness in Patients with Microvascular Angina impedes the

growth of the market over the forecast period of 2020-2027.

The regional analysis of global Medical Nitroglycerin Sprays market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the early adoption of technology and well-established infrastructure along with series of regulatory approvals and amendments by FDA. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rapidly increasing investments in healthcare infrastructure would create lucrative growth prospects for the Medical Nitroglycerin Sprays market across Asia-Pacific region.
