Abstracts

Global Melt-Blown Polypropylene Filters Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Melt-Blown Polypropylene Filters are made from polymer fibers. First, Polymer fibers are pressed and sintered, then melt-blown onto a rotating spindle to create cylindrical cartridges. It has applications in wide range of products such as PPE face masks and respirators, vacuum cleaners, cabin aircraft filters in aircraft, wastewater treatment, Pre-filtration for Reverse Osmosis and filtration applications in food and beverages sector. Growing water and wastewater treatment industry and rising Food & beverages sector as well as increasing end use applications of Polypropylene Filters are key drivers for growth of Melt-Blown Polypropylene Filters Market. For instance, as per Statista – in 2020, Worldwide water and wastewater treatment market was estimated at USD 263.07 billion and, as per projections the market would grow to USD 500 billion by end of 2028. Furthermore, in January 2021 LOTTE Chemical's new polypropylene (PP) materials for melt blown (MB) filters cleared Korean filter standard called, KF94. This new PP material offers narrow dispersion of molecules and endures discoloration with high stability when exposed to high temperatures and external aggressors (NOx gas, etc.). Also, growing demand for freshwater and increasing investment for the treatment of wastewater are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, increasing demand of membrane filtration and stringent government regulations impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Melt-Blown Polypropylene Filters market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to increasing investment activities towards water treatment plants and rising food and beverages sector in the region. Whereas, North America is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as growing oil and gas sector and presence of leading Market players, would create lucrative growth prospects for the Melt-Blown Polypropylene Filters market across the North American region.
