## **Abstracts**

Global Mesh Bags Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Mesh Bags also known as string bag, or net bag can be defined as a bag that are made out of mashed strings. These bags are made with several materials such as Jute, Cotton, Polypropylene, High Density Polyethylene, and Plastic among others. These bags come in different capacities such as 500-1000lb. The rising demand for flexible packaging solutions and increasing adoption of reusable packaging formats as well as recent product innovations from leading market players are accelerating the global market demand. For instance, according to Statista – During 2020, the global market for flexible packaging solutions was valued at 42.64 billion and it is projected to grow to USD 56.3 billion U.S. dollars by 2025. Furthermore, leading market players are coming up with new & innovative products to leverage growing demand for mesh bags. For instance, in March 2021, French luxury leather goods company Longchamp launched its new range of mesh bags. These new bags come in long and short strap design, different bright colours options and leather handle. Also, growing penetration of supermarkets and organized retail outlets and rising advancements in packaging technology are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, a high cost associated with mesh bags and rising concern over risk of bacterial infection impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Mesh Bags Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing adoption of mesh bags from supermarkets and grocery stores. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as increasing demand for reusable packaging solutions and rising penetration of small-scale mesh bag manufacturers in the region, would create lucrative
