## **Abstracts**

Global Micro and Nano PLC Market is valued at approximately USD 7.96 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 6.10% over the forecast period 2022-2029. A Programmable Logic Controller (PLC) is a type of digital computer that is specially designed to automate industrial electromechanical processes. These PLCs are bifurcated into two types micro PLC and Nano PLC. This controller takes decisions to manage the state of the output devices while monitoring and controlling the state of the input devices. These are created to handle complicated tasks for efficient industrial processes. . The requirement for compact automation solutions and the rising adoption of regulatory compliance and the increasing awareness of Micro and Nano PLCs is expected to fuel the demand for Micro and Nano PLCs across the world.

The growing trend of home & building automation is also acting as a significant factor, which is attributed to the market growth across the world. According to Statista, there were around 259.89 million smart homes were recorded globally, which is anticipated to reach 478.22 smart homes by the year 2025. Accordingly, the rising number of smart homes is fostering the adoption of Micro and Nano PLC, which, excels the market expansion at a substantial rate. Furthermore, the widespread adoption of IoT connectivity, as well as the increasing integration of micro PLCs with Human Machine

Interface (HMI) are presenting various lucrative opportunities over the forecasting years. However, the volatility in the prices of oil and gas and high investments is required for expansion may hinder the growth of the market.

The key regions considered for the Global Micro and Nano PLC Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the automation and servicing requirements in the region. Also, supportive government programs, annual events, and conferences are further fueling the growth of the market in the region. Whereas, Asia-Pacific is also anticipated to exhibit the highest CAGR over the forecast period 2022-2029. Factors such as the increasing number of manufacturing facilities along with advanced technology such as smart manufacturing and ageing infrastructure would create lucrative growth prospects for the Micro and Nano PLC market across the Asia-Pacific region.
