Abstracts

Global Micro VC Funds Market is valued at approximately USD xx billion in 2022 and is anticipated to grow with a healthy growth rate of more than xx% over the forecast period 2023-2030. Micro VC (Venture Capital) funds are investment funds that focus on giving startups and small enterprises early-stage finance. Compared to traditional venture capital funds, these funds often invest smaller sums of money, typically between a few hundred thousand and a few million dollars. The factor that drives the growth of the market is the rise in investments by SMEs in private equity ventures. As per World Intellectual Property Organization, the number of VC deals between 2020 and 2021 grew by 46% which is estimated to fluctuate in the coming years and mostly there will be an increasing trend which led to an increase in demand for VCs. The other factor that drives the growth of the market is the favorable government regulations for equity ventures across the globe. It will give a supportive environment for the development of growth of venture capitalists. However, the risk of loss in equity hinders the growth of the micro-VC funds market.

The growth opportunity for the market is the surge in venture capital funds for start-ups as there is an increasing trend of start-ups, and most of the people have to open their startups. As per Statista, in 2022, there is total of 80,152 startups that have been officially recognized by the Department for Promotion of Industry and Internal Trade. And according to US Business Formation Statistics (BFS), there are a total of 5.07 million business applications filed in 2022. The startup trend will continuously grow at a

faster pace, and it will create a lot of opportunities for the VC funds market. The other opportunity for the market is the increase in the adoption of digital platforms across the globe as there will be more access to global markets which means there is an expansion of investment opportunities for the VCs.

The key regions considered for the Global Micro VC Funds Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 owing to the presence of startups in the region and the system of VCs is already established there which provides a lot of opportunities in the region as well. Asia Pacific is expected to grow significantly during the forecast period, owing to factors such as the number of startups in the region are on the rise which provides high investment opportunities to venture capitalists.
