Abstracts

Global Microdermabrasion Devices Market is valued at approximately USD 474.20 million in 2021 and is anticipated to grow with a healthy growth rate of more than 8.6 % over the forecast period 2022-2028. Microdermabrasion is a non-invasive process that improves the overall tone and texture of the skin. Sun damage, wrinkles, fine lines, age spots, acne scarring, melasma, and other skin-related issues and conditions can all be improved with it. Microdermabrasion devices, which employ suction to exfoliate skin and remove impurities, are widely used in professional salons. They eliminate dead cells with diamond points or tiny crystals, leaving your face clear and refreshed. Increasing skin related issues, increasing geriatric population demanding healthy and renewed skin, accessibility of social media, and rising trend of skin procedures has driven the adoption of Microdermabrasion Devices across the projected period. For Instance: According to the American Society of Plastic Surgeons, roughly 522,693 microdermabrasion operations will be performed in the United States in 2020 and According to a Medical News Today report, women with low self-esteem and a lot of social media exposure are more likely to get cosmetic surgery. Increasing incorporation of technology in the Market and rising disposable income is most likely to boost the overall growth of the Microdermabrasion Devices Market. However, high cost of skin treatments & procedures and risks associated with skin treatment can obstruct the Market's expansion over the projection period of 2022-2028.

The key regions considered for the Global Microdermabrasion Devices Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world. Increasing trend of cosmetic procedures and rising demand for minimally invasive techniques are driving the Market growth in North America. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. The Market is expected to grow during the projected period, due to rising skin awareness and people's consciousness on physical appearance.
