## **Abstracts**

Global Migraine Treatment Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. A migraine is a headache that causes severe throbbing pain or a pulsing sensation, usually on one side of the head. Rising awareness regarding migraine, growing prevalence of migraine and new treatment launches for migraine are the major factors driving the growth of the market. Such as, in August 2020, Eversana partnered with Zosano Pharma Corp. for the distribution and commercialization of Qtrypta, in the United States. Qtrypta is a transdermal migraine treatment candidate. Also, in May 2021, Impel NeuroPharma launched Reroute Migraine Relief, an educational initiative aimed at raising awareness of the complexities of migraine, including the underrecognized connection between the brain and gut. Furthermore, approval for new migraine treatments coupled with research and development activities taking place for migraine treatment are the factors expected to inject growth in the coming years. In September 2021, U.S. Food and Drug Administration (FDA) awarded approval to QULIPTA, the preventive treatment of episodic migraine in adults. However, presence of alternative therapies such as homeopathy and limitations of current therapies may impede the growth in the near future.
